

ENVIRONMENTAL POLICY

All Saints Construction are committed to providing a quality service in an approach that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment.

We will operate in compliance with all relevant environmental legislation and will actively engage in pollution prevention and environmental best practices including working towards ISO 14001.

Our Policy includes:

- Incorporate consideration of environmental concerns and impacts into our decision making and activities
- Minimise waste and increase reuse and recycle
- Minimise energy and water use in order to conserve supplies and minimise consumption of natural resources
- Communicate our environmental commitments to our Clients, staff and the general public and actively engage them to support it
- Educate our workforce about environmental issues that may affect their work activities
- Consider environmental practices within our supply chain
- Develop and maintain appropriate systems and processes in relation to environmental management
- Strive to achieve ISO 14001

Going forward our aim is to identify, track and inform our employees and interested parties what our goals are for environmental management. We intend these to be relevant with all levels of staff and consistent with our environmental policy using the SMART elements:

- Specific
- Measurable
- Agreed
- Realistic
- Time-Based

This will provide a clear target for all employees in All Saints Construction to work towards the overall environmental goals and in effect let everyone know where the environmental programme is heading.
